

SOLAR SURFACE PUMPS

Engineered for
high-pressure
applications with-
out sacrificing flow.

Light Weight | Low Maintenance | Portable Solution

Our core competency lies in technology and quality product manufacturing, ensuring reliable and affordable water supply for everyone.

Product Features

- DC Motor
- Pressure upto 30 m
- Excellent suction lift capabilities
- Low shear and Linear flow
- Can handle liquid with fine solids
- Progressive cavity type

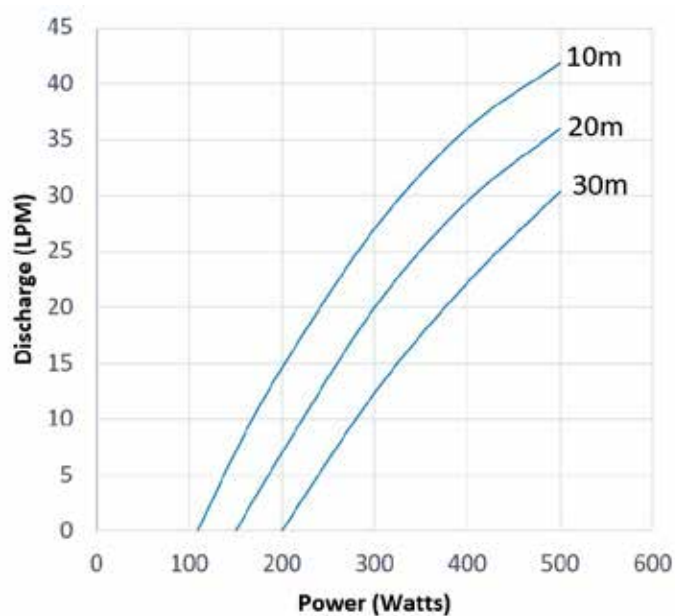

Applications

- Livestock watering
- Fish farming
- Irrigation and Gardening
- Household water supply
- Drinking water supply
- Water and Sanitation

Performance Summary

Power: 500 Watts

Solar Surface	Input Power (Watts)					
	500	400	300	200	150	100
Head (m)	Flow (LPM)					
10	42	36	27	15	7	0
20	36	30	20	7	0	
30	30	22	12	0
